For

High-Risk Individuals

TAKEOUT/ DELIVERY

Recommendation for high-risk individuals to do takeout/delivery instead of dine-in to protect the *high-risk individual's health

Higher risk for severe illness from COVID-19

- People aged 65 years and older
- Those living at a senior living facility
- People of all ages with underlying medical conditions,

including chronic lung disease, asthma, heart conditions, severe obesity, chronic kidney disease, liver disease, or otherwise immunocompromised (undergoing cancer treatment, smoker, bone marrow or organ transplantation, immune deficiencies, poorly controlled HIV or AIDS, and prolonged use of corticosteroids and other immune weakening medications)

Let's work together to keep our community safe.
